EDUCATION

B.Sc. International Computer Science (Informatik): OTH Regensburg (7th semester) 10/2023–Current
Coursework: Information Security, Databases, Algorithms & Data Structures, Computer Architecture, Cloud Computing, Statistics.

PROJECTS

FuelTrack: Real-time Fuel Price Web App Website link 06/2026
Microsoft Azure · Tankerkoenig API · Python · JavaScript · HTML/CSS
- Built a serverless pipeline that ingests live TankerKoenig API data into a real-time web dashboard.
- Used Azure Functions for the backend and Blob Storage for hosting. Set up a one-trigger CI/CD deployment.

AI Resume Screener Website Link 05/2026
Python · Streamlit · Groq API · LLaMA 3
- Built an AI app that compares a CV with a job description. It outputs a match score (0-100%), skill gaps and recommendations.
- Integrated Groq LLaMA 3.3 with automated PDF parsing. Deployed on Streamlit Cloud.

TweetGo: Full-Stack Microblogging Platform Github Link 07/2025
Java · Spring Boot · Spring Security · JWT · Vite · REST API · Swagger · MariaDB · Docker
- Built a Twitter-like platform with JWT authentication, follows, likes, comments and hashtags.
- Developed a Spring Boot REST API with MariaDB and Swagger docs, plus a Vite frontend. Containerized with Docker Compose for single-command deployment.

WORK EXPERIENCE

Sales Assistant (Working Student): HW Gastro Konzept GmbH(Metzgerei Wasner), Regensburg 09/2025-Current
- Serve customers in German at the buffet and sales counter in a retail branch.
- Balancing a part-time job with full-time studies, and using daily customer contact to improve my professional German.

Data Analytics Intern : Bosch Car Service Centre (United Motors), Dahod, India 05/2023–07/2023
- Analyzed sales and operational data using Power BI to identify inefficiencies and improve service productivity.
- Presented insights and recommendations that supported management decisions and contributed to revenue growth.

Website Developer Intern : Malhotra Electronics Pvt. Ltd. (Wybor), Noida, India 02/2023–04/2023
- Helped design and develop the company website with responsive layouts (HTML, CSS, JavaScript).
- Tested and debugged core features, reducing display and functionality issues before launch.
