Regensburg, Germany | +4915212527251

[linkedin.com/in/bhanguharman](https://www.linkedin.com/in/bhanguharman)

Driving Licence: Class B

PROFILE

Computer Science student at OTH Regensburg (6th semester) with hands-on experience in Python, JavaScript, REST APIs, cloud deployment (Azure), and CI/CD. Developed several complete web applications, including an AI-powered tool and a full-stack platform utilizing Docker and automated deployment.

EDUCATION

B. SC INTERNATIONAL COMPUTER SCIENCE (INFORMATIK)

10/2023 – Present

Ostbayerische Technische Hochschule Regensburg (6th semester)

Relevant coursework: Databases, Algorithms & Data Structures, Computer Architecture, Cloud Computing, Statistics, Information Security.

PROJECTS

FuelTrack – Real-time Fuel Price Web App | [Website link](#)

06/2026

Microsoft Azure Services · Tankerkoenig Api · Python · JavaScript · HTML/CSS

- Built a serverless web application displaying live German fuel prices via the TankerKoenig API.
- Implemented Azure Functions for backend request handling and Blob Storage for static hosting.
- Designed a CI/CD pipeline enabling fully automated, single-trigger cloud-native deployment with zero manual server management.

AI Resume Screener | [Website Link](#)

05/2026

Python · Streamlit · Groq API · LLaMA 3

- Developed an AI web application that analyzes candidate's CV against job description and generates a match report.
- Integrated Groq LLaMA 3.3 for natural language analysis and implemented automated PDF parsing.
- Deployed publicly on Streamlit Cloud, outputting a match score (0-100%), skill gap analysis, and improvement recommendations.

TweetGo – Full-Stack Microblogging Platform | [Github Link](#)

07/2025

Java · Spring Boot · Spring Security · JWT · Vite · REST API · Swagger · MariaDB · Docker

- Built Twitter like platform featuring JWT-based authentication, social interactions, and full stack architecture.
- Developed a Spring Boot REST API with MariaDB and Swagger documentation, paired with a Vite-powered frontend.
- Containerized the full stack (Frontend/Backend) using Docker Compose, enabling single-command deployment of follows, likes, comments, and hashtag features.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, C, C++, SQL

Frameworks & Libraries: Spring Boot, Spring Security, React.js

Cloud & Infrastructure: Azure Functions, Azure Storage, Azure API Management, Docker, CI/CD

Databases: MySQL, MariaDB, SQLite, SQL

AI & APIs: LLM Integration, REST APIs, Swagger

Web & UI: HTML, Bootstrap, Tailwind CSS, Vite

Tools & OS: Git, Linux (Ubuntu/Debian), Microsoft 365, JWT, Jira

CERTIFICATES

Master Python Programming (Udemy) — Python fundamentals, scripting, and algorithmic problem-solving.

LANGUAGE SKILLS

German: B1 (Intermediate) | English: C2 (Fluent) | Hindi: Native
